

EXPERIENCE

# URANUS

## FAST FACTS

Planet type: ice giant

Distance from the sun: ~2.9 billion km

Distance from Earth: ~2,723,950,000 km

Revolution (1 year): 84 years

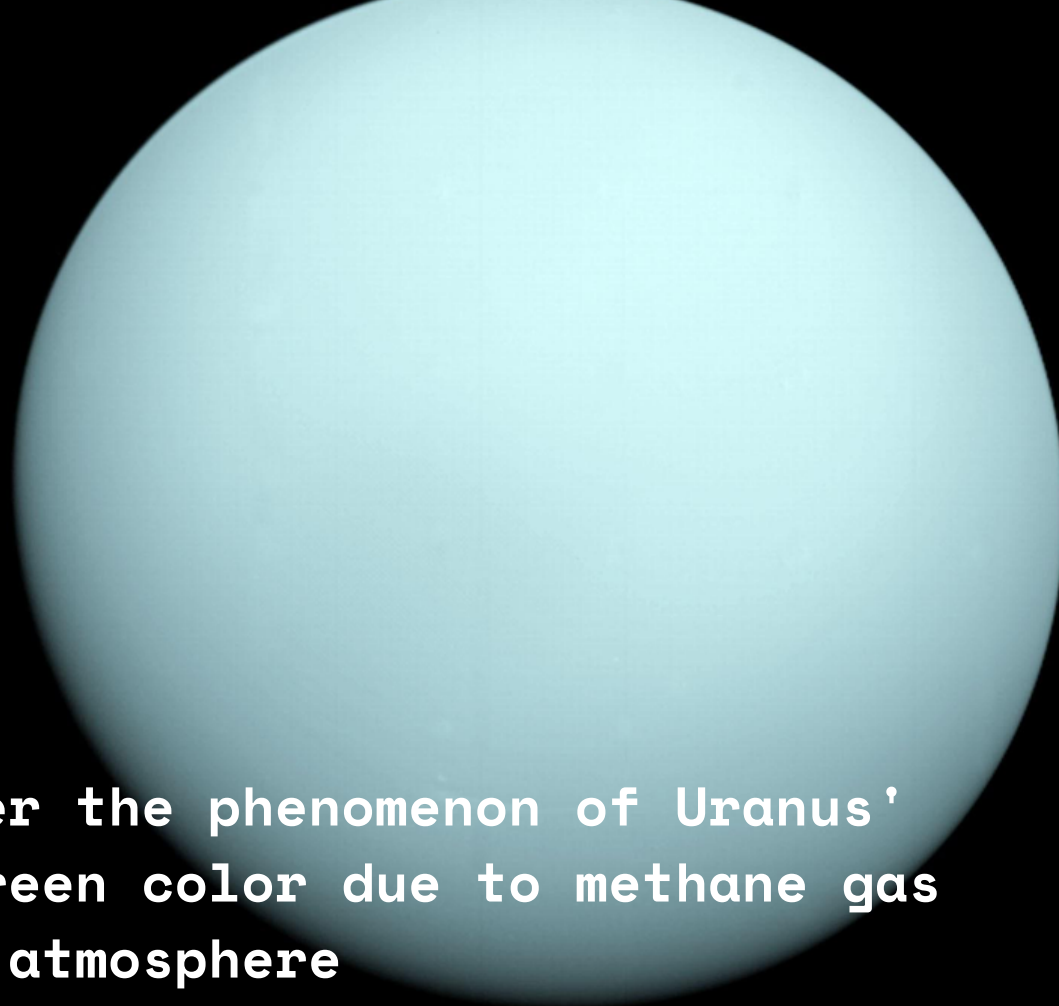

Rotation (1 day): 17 hours 14 minutes

Satellites: 27 moons

Temp

### Day 1:

Witness Uranus' extraordinary tilted axis as it rotates on it's side at nearly a 90 degree angle!

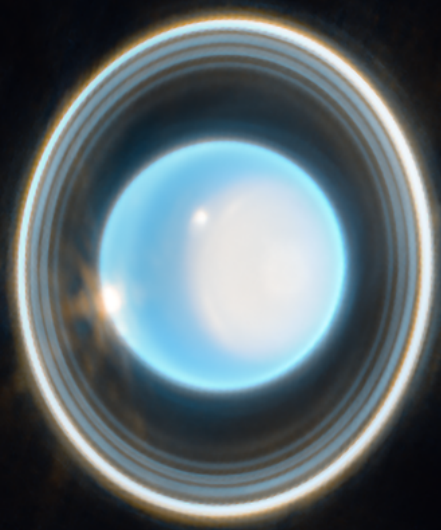

## Day 2:

Discover the phenomenon of Uranus' blue-green color due to methane gas in its atmosphere

## Day 3:

Must see Feature:  
Uranus Clouds'

Uranus exhibits dynamic clouds as it approaches equinox, including rapidly changing bright features.

## Day 4-6: Check out some of Uranus' 27 moons

Uranus has the coldest temperatures in the solar system

*Brrr... Pack your extreme winter gear*

My class and I went to Uranus for a school trip. It was BEAUTIFUL but quite cold but the cold never bothered me anyways! 🧊
